Twinning Procedure

1 - TWIN

2 - SELECT

3 - PREPARE

4 - PERFORM

5. FEEDBACK

Find a twin academy

Choose a twin academy based on student level, student age, common language.

Academy instructors of both academy will agree on the goals.

Select Lab

Based on student level, select a lab in the following list or create your own lab.

Academy instructors should agree on prerequisites, timing & schedule lab session.

In this step, you should check the connection to the cloud server.

Prepare

Students will have prepared the lab at home or in the classroom.

Students will create an account on teams.webex.com for example to allow for teaming with peering academy.

Perform Lab

Students will work in teams. For example, you will have a team of 2 students in the first academy peering with 2 students in the second academy.

Get Feedback

Students should give A feedback on the activity.

Each student should explain the most exciting part of the lab.
